PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in Java, web development, databases, and backend application development. Skilled in building responsive applications using Java, JavaScript, React.js, SQL, MongoDB, Python and REST APIs. Familiar with software engineering principles, object-oriented programming, version control, and backend technologies including Spring Boot fundamentals. Strong analytical and problem-solving skills with interest in scalable backend systems and cloud technologies.

TECHNICAL SKILLS

- Programming Languages: Python, Java
- Frontend Technologies: React.js, HTML5, CSS3, JavaScript, Redux
- Backend & Frameworks: Spring Boot, Node.js, REST APIs
- Database: PostgreSQL, MongoDB, MySQL
- Tools & Platforms: Git, GitHub, Linux, VS Code
- Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Software Engineering
- AI & Productivity Tools: GitHub Copilot, Claude, ChatGPT, AI Coding Assistants
- Other Knowledge: Cloud Computing Basics, AWS Fundamentals, Cybersecurity Basics

PROJECTS

Employee Management System | Java, Spring Boot, PostgreSQL

- Developed a backend CRUD application using Spring Boot and PostgreSQL.
- Implemented RESTful APIs for employee record management.
- Designed database schemas and integrated backend services with persistent storage.
- Used Git for version control and project management.

Stock Market Prediction System | Python, Machine Learning

- Built a machine learning model for stock price prediction using historical datasets.
- Applied time-series preprocessing and data analysis techniques.
- Visualized prediction performance using training and testing datasets.

AI Automation & Business Solutions Website | React.js, JavaScript, AI APIs, UI/UX Design

- Developed a modern AI-powered business website focused on intelligent automation solutions.
- Designed responsive user interfaces with modern layouts, interactive sections, and scalable frontend architecture.
- Showcased AI automation tools, API integrations, and SaaS-based business solutions with responsive design, optimized performance, and reusable frontend components.

College Portfolio Website with CMS Integration | React.js, Sanity CMS

- Developed and deployed a scalable portfolio application using React.js and Sanity CMS.
- Integrated APIs for dynamic content management and deployment workflows.
- Improved maintainability through API-driven architecture and reusable components.

INTERNSHIP EXPERIENCE

Full Stack Development Intern — SPARK INVENTIVE

(Oct 2025 - Mar 2026)

- Worked on full stack development tasks involving frontend and backend technologies.
- Contributed to responsive web application development and feature implementation.
- Collaborated effectively with team members on development tasks, demonstrating strong teamwork and communication skills.
- Assisted in debugging, testing, and improving application functionality.
- Gained practical exposure to software development workflows and scalable application design.

EDUCATION

B.E. Computer Science and Engineering

Vels Institute of Science, Technology & Advanced Studies, Chennai

2021 – 2025 | CGPA: 6.9

CERTIFICATIONS

- Full Stack Development – Imarticus Learning
- Frontend Development – Great Learning
- Introduction to Machine Learning – NPTEL
- Cloud Computing Certification – Future Calls
- Cyber Security Level 1 – Future Calls
- Web Development Professional Program – MTF Institute of Management, Technology & Finance
- Prompt engineering - Great Learning

LANGUAGES

- English
- Tamil
